# **WEATHER KEY POINTS**

**07/19/19 - 07/25/19**

## **Friday**

- Dry and breezy afternoon conditions will create slightly elevated fire weather concerns for portions of Southern and Inland Regions
- Generally temperatures are near normal or slightly below normal, but some southern Desert areas will still be hot enough to have slightly elevated heat related impacts possible

## **Saturday-Wednesday**

- Warming and drier conditions will continue slightly elevated fire weather concerns for southern portions of Coastal Region, mainly northern portions of Inland Region, and eastern portions of Southern Region. Breezy afternoon and evening winds will also add to these issues for portions of Inland Region and eastern areas of Southern Region each day.
- Isolated thunderstorms possible over the high Sierra Saturday/Sunday and then also across portions of Southern Region each day next week
- Temperatures will gradually warm across the state with increasing heat related impacts possible for portions of Inland Region (including some Sierra foothills areas where overnight temperatures will not offer much relief from the heat), and continued potential for heat impacts in the Southern Region desert areas
